

The TMT Tubing Hanger Emergency Release Tool (THE RT) is an ROV interface panel that has brackets so that it may be mounted to a 5" (127mm) outside diameter tube. It is a means of supplying hydraulic pressure to the tubing hanger release cylinder via a 2 port ISO hot stab to the ROV.

The hydraulic fluid is supplied via a pair of 4m long hydraulic hoses connected to the tooling port on one end and to the ROV interface panel via the 2 port hot stab on the other end.

Features:

- Easy to install & remove
- Corrosion resistant materials
- ROV deployable

Specifications:

- | | |
|-----------------------|--------------------|
| • Dimensions | 475L x468W x750Hmm |
| • Weight in Air | 55kg |
| • ROV Valve | 1/2" NPT |
| • Max Supply Pressure | 3000psi |
